Handheld Bidet Spray Gun

Product Overview

Handheld Bidet Spray Gun | IN-C2114-BS

Designed for simplicity, reliability, and everyday comfort, this mechanical bidet provides an efficient hygiene solution without the need for electricity. Its durable ceramic valve, brushed finish, and straightforward wall-mounted installation make it suitable for a wide range of residential and commercial bathroom environments.

Engineered for dependable performance, the unit operates using standard household water pressure and is compatible with most modern bathroom installations. Its non-electric design reduces maintenance while offering an environmentally friendly alternative that helps minimise toilet paper consumption.

Whether installed in homes, apartments, hotels, offices, or other commercial facilities, this bidet delivers a practical and cost-effective solution for improving everyday bathroom hygiene.

Key Features

- **Durable Copper & ABS Construction**
Manufactured using a combination of copper and high-quality ABS materials for strength, durability, and long-term performance.
- **Mechanical, Non-Electric Operation**
Operates without electricity, providing a reliable and low-maintenance hygiene solution.
- **Ergonomic Spray Gun Design**
Designed for comfortable handling with precise water control for effective everyday use.
- **Suitable for Bathroom & Kitchen Applications**
Versatile design suitable for residential homes, apartments, hotels, commercial bathrooms, and utility areas.
- **Premium Grey Finish**
Modern grey finish designed to complement a wide range of contemporary bathroom styles.
- **Quality Assured Manufacturing**
Manufactured in accordance with CE and ISO 9001 quality standards.
- **3-Year Quality Warranty**
Supported by a 3-year manufacturer's quality warranty covering manufacturing defects and quality-related issues.
- **Professional Export Packaging**
Supplied in secure export packaging designed to protect the product during transportation and storage.
- **Easy Installation**
Designed for straightforward installation using standard plumbing connections.
- **Built for Everyday Reliability**
Engineered for consistent daily performance in both residential and commercial environments.
